# About Us.

★ ★ ISO 9001 : 2015 CERTIFIED ★ ★

KRISHLORD SALVAGE LLP is dedicatedly involved and leading a significant role in providing exceptional marine service across various marine industry. We are leading service provider for major marine industries in India.

Our clients include leading companies from the shipping company, port and marine industries. We have a proven track record of successfully completed projects. We use advance tecnology to the highest reliability standard. Trust KRISHLORD SALVAGE LLP to keep your project running smoothly and timely completed.

KRISHLORD SALVAGE LLP is a one stop solution for all your marine services. KRISHLORD SALVAGE LLP Was incorporate in 2018,a venture lead by marine professional offering diverse service to the marine industry.

# Who We Are & What We Do.

- KRISHLORD SALVAGE LLP – Is commitment to as customer satisfaction with decades of experience and a proven track record of success.
- Started with the marine services in the field of process shipping company, Port and marine industries. by team of highly qualified engineers has significant experience in the marine services.

## MISSION

- Continues upgrading of equipment, skill to made suitable for latest technology of marine industries. We believe in best marine service which meets international standard.

## VISION

- At the core of our company is to set new benchmark shipping and marine industries. we aspire to be the preferred partner for clients across the shipping and marine industries, offering tailored solutions that exceed expectations for all marine services.

# Why Choose Us.

We have wide range of marine industries experience including shipping company, Port and marine services.

## SPECIALTIES

- Ship repair & maintenance
- Jetty & marine construction
- Salvage & wreck removal
- Inspection
- Under water welding
- Under water cutting
- Submerged vessel flot ( if possible )

# THE ORGANIZATION

Leadership Driving Marine Excellence . . .

## DHRUV YADAV

### MANAGING DIRECTOR

Commercial Air Diver  
Marine Salvage Specialist

#### MARINE SALVAGE

Expertise in complex salvage and recovery operations

#### UNDERWATER OPERATIONS

Specialized in commercial diving and underwater works

#### VESSEL FLOATING

Proven experience in vessel refloating and stabilization

#### PROFESSIONAL JOURNEY

Mr. Dhruv qualified as a Commercial Air Diver from a reputed institute in Mumbai and began his professional diving career in 2007. Over the years, he has built a strong reputation in the commercial diving industry through his technical expertise, precision, and uncompromising commitment to safety.

#### OPERATIONAL EXPERTISE

With extensive hands-on experience in underwater operations, vessel floating, and marine salvage projects, Mr. Dhruv has successfully contributed to numerous complex marine assignments. His deep understanding of underwater engineering practices and problem-solving capabilities enables him to execute challenging operations efficiently and safely.

#### LEADERSHIP & VISION

Throughout his career, Mr. Dhruv has demonstrated exceptional leadership in planning and executing salvage operations, underwater inspections, and marine recovery projects. His commitment to maintaining the highest operational and safety standards has earned industry recognition and client trust.

With years of practical experience and technical expertise, he continues to play a key role in delivering reliable and effective marine salvage and underwater solutions for clients across India.

## Service

# MARINE SALVAGE OPERATIONS

Krishlord Salvage LLP specializes in Marine Salvage & Wreck Removal. Marine salvage involves rescuing vessels, cargo, or property from dangerous situations. Our services include emergency support for vessels at risk of sinking, rescue towing, refloating grounded ships, and conducting repairs. We prioritize the recovery of pollutants, such as oil and hydrocarbons, from sunken vessels, mitigating the significant environmental hazards they pose.

As India's only fully operational salvage company, with an unmatched record of international and domestic successes, Krishlord Salvage has proudly executed at least one major salvage operation annually since its inception. Our commitment to innovation and continuous improvement in the salvage field is key to our success.

With a highly skilled team involved in every stage—from initial planning to final execution—Krishlord Salvage LLP remains a leader in marine recovery operations.

Service

## OFFSHORE DIVING SERVICES

Offshore diving is one of the most recognized branches of commercial diving, with professionals supporting the exploration and production sectors of the oil and gas industry. The work primarily involves maintaining oil platforms, constructing underwater structures used in production, and performing installation, NDT surveys, UWILD surveys, CCTV inspections, and general underwater inspections.

Our offshore diving operations adhere to U.S. Navy and IMCA standard diving procedures, ensuring safety and efficiency. Krishlord Salvage has a dedicated Offshore Diving division that specializes in all types of inspections, maintenance, and repairs for vessels and underwater structures, prioritizing risk mitigation and delivering high-quality results.

Service

## MARINE CONSTRUCTION & DREDGING

Onshore diving plays a crucial role in supporting land-based civil engineering projects, with much of the work focused on underwater surveys and construction activities. Many of our dive sites are located in harbors and sheltered waters, where divers are often engaged in critical tasks.

Dredgers are utilized to maintain, expand, and deepen areas that have gradually become shallow due to the accumulation of silt, mud, sand, and other sediments. Krishlord Salvage operates two small dredgers specifically designed for such projects. These compact dredgers are highly maneuverable, making them ideal for working in tight or confined areas. They feature a swinging ladder configuration, allowing them to operate without the need for external swing wires or anchors.

## Service

# DIVING SERVICES ON HYDRO POWER PLANTS/DAMS & DE-SILTING

As the name suggests, 'Hydro' underwater diving services are essential for hydroelectric power plants and dams, often contracted for specialized tasks. Penstocks in hydroelectric installations are typically equipped with gate systems and surge tanks, with water flow regulated by turbine operations. When turbines are inactive, water flow is stopped entirely. Maintenance tasks in these environments include underwater inspections, surveys, repairs, manual cleaning, de-silting, and desiccation.

Underwater diving at hydro power plants and dams involves significant risk, as divers often need to inspect and repair outfalls, which may require penetrations ranging from 10 meters to over 500 meters. These operations demand stringent safety protocols and specialized equipment to ensure diver safety while delivering high-quality results.

## Service

# MARINE CONSULTANT

A marine consultant is a professional who provides expert advice and services related to maritime operations, including ship management, marine engineering, offshore projects, environmental compliance, and docking & undocking

Marine consultants also play a critical role in ensuring regulatory compliance and safety at sea. They assist clients with vessel inspections, risk assessments, port operations, feasibility studies, and maritime logistics planning. With in-depth knowledge of international maritime laws and industry standards, marine consultants help optimize performance, reduce operational risks, and support efficient, environmentally responsible marine activities.

# PROJECT CASE STUDY – HULL INSPECTION

Krishlord Salvage LLP | Marine Salvage Operations

## Tug Aoraki Hull Inspection Project

Port of Mumbai, Maharashtra

### PROJECT DETAILS

-  Vessel Name  
Tug Aoraki
-  Client  
Pragati Marine Service Pvt Ltd
-  Scope of Work  
Underwater Hull Inspection
-  Location  
Port of Mumbai, Maharashtra

### PROJECT OVERVIEW

Krishlord Salvage LLP conducted an underwater hull inspection of the tugboat **Tug Aoraki** at the Port of Mumbai, ensuring compliance.

The inspection process involved certified commercial divers who carried out a thorough examination of the tug's hull and underwater components.

Underwater video and photographic documentation were captured to assess the condition of the hull, propeller, and other critical components.

The project was completed in coordination with the client, delivering precise and reliable inspection services within the stipulated timeframe.

Tug Aoraki Hull Inspection – Krishlord Salvage LLP

## Rig Deepsea Matdrill Salvage Operation

Adani Dighi Port, Raigad

### PROJECT DETAILS

Vessel Name  
Rig Deepsea Matdrill

IMO Number  
8755053

Client  
Nirmala Offshore Services

Scope of Work  
Marine Salvage Operation

Location  
Adani Dighi Port, Raigad

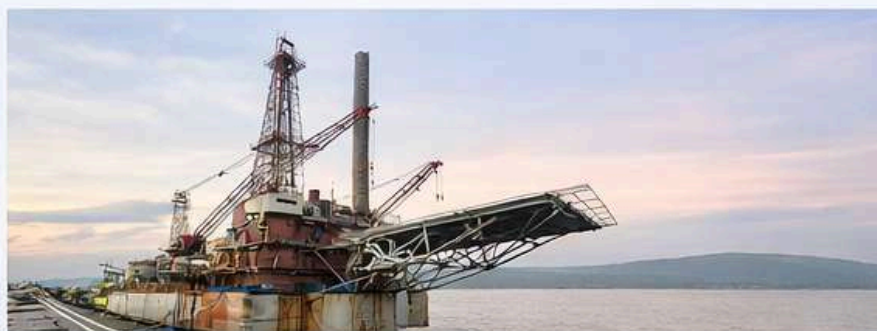

### PROJECT OVERVIEW

Krishlord Salvage LLP successfully executed the salvage operation of the offshore drilling rig **Deepsea Matdrill** at Adani Dighi Port, Raigad.

The project involved underwater inspection, structural stabilization, and careful execution of salvage procedures by certified commercial divers and marine engineers.

Through precise planning and deployment of specialized salvage equipment, the operation was carried out safely and efficiently while adhering to international marine safety standards.

Our experienced team ensured seamless coordination with the client and port authorities, delivering the project successfully under challenging marine conditions.

## CSD7 Dredger Salvage Operation

Narmada River – Ankleshwar

### PROJECT DETAILS

-  Vessel Name  
CSD7 Dredger
-  Client  
Laxyo Limited
-  Scope of Work  
Marine Salvage Operation
-  Location  
Narmada River – Ankleshwar

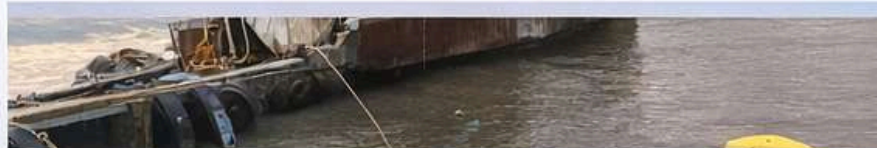

### PROJECT OVERVIEW

**Krishlord Salvage LLP** successfully carried out the salvage operation of the **CSD7 dredger** in the Narmada River at Ankleshwar.

The project involved underwater inspection, stabilization of the vessel, and execution of specialized salvage procedures by experienced commercial divers.

Operating in challenging river conditions, the team deployed advanced salvage equipment and coordinated closely with the client to ensure safe and efficient recovery operations.

The project was completed with strict adherence to marine safety standards and environmental protocols.

Salvage Operation – Narmada River Project
